SUMMARY

Cybersecurity Consultant with 2 years of experience in Vulnerability Assessment and Penetration Testing (VAPT) across Web Applications, APIs, Android Applications, and Network Infrastructure. Skilled in Web Application Security, API Security, Infrastructure Security, Firewall Configuration Reviews, and Secure Source Code Reviews. Proficient in identifying vulnerabilities, performing risk assessments, and delivering detailed security reports with actionable remediation recommendations. Experienced in validating security fixes, supporting vulnerability remediation, and collaborating with clients to ensure secure application releases and compliance with industry security best practices, including OWASP Top 10.

PROFESSIONAL EXPERIENCE

GRM Technologies, Cyber Security Consultant

09/2024 – Present | Chennai, India

- Performed VAPT across 40+ client engagements spanning Web Applications, Android Applications, APIs, Network Infrastructure, and Wireless Networks
- Identified, validated, and documented 80+ vulnerabilities with CVSS scoring and business-impact risk ratings; delivered remediation reports with actionable fixes
- Conducted secure source code reviews and firewall configuration assessments to uncover logical flaws and misconfigurations
- Used Burp Suite, Nmap, Nessus, Metasploit, Wireshark, and OWASP ZAP across concurrent on-site and remote engagements
- Partnered with clients to align security practices with OWASP Top 10 and industry compliance standards

EDUCATION

B.E Cyber Security, Paavai Engineering College
84.9%

11/2020 – 05/2024 | Namakkal, India

SKILLS

— **Security Testing & Assessment:** | Vulnerability Assessment & Penetration Testing (VAPT) | Web Application Security Testing | Mobile Application Security (Android) | API Security Testing | Infrastructure Security Assessment | Wireless Security Assessment | Source Code Review | Firewall Configuration Review

— **Tools & Technologies:** | Burp Suite | Nmap | Metasploit | Nessus | Wireshark | OWASP ZAP | Nikto | Kali Linux | Snyk | Android Studio

LANGUAGES

Tamil Native	English Fluent

CERTIFICATES

Certified Ethical Hacker (CEH)
Platform: EC-Council

Google CyberSecurity Certification
Platform: Coursera(200hrs)

Certified Appsec Practitioner v2
Platform: The SecOps Group

Certified Cybersecurity Educator Professional (CCEP)
Platform: Red Team Leaders

PROJECTS

Virtualized Red Team Lab Environment

Designed and deployed a virtualized Red Team lab comprising a Windows client, Active Directory Domain Controller, Linux attacker machine, and Linux bastion host to simulate enterprise networks and practice penetration testing, Active Directory attacks, and post-exploitation techniques.

jsrecon — Automated JS Recon Pipeline

Built an automated reconnaissance tool that crawls target web applications, downloads JavaScript files in parallel, and analyzes them to extract exposed API endpoints and leaked credentials by chaining katana, httpx, and gitleaks into a single pipeline. Implemented configurable multi-threading, rate limiting, and custom regex-based secret detection to streamline reconnaissance during web application security assessments. GitHub: github.com/Shajan-2002/jsrecon 🔗

CI/CD Security Lab

Built and secured CI/CD pipelines using Git and GitHub Actions to gain hands-on experience in pipeline security, secret management, dependency scanning, and secure software delivery practices.
