SUMMARY

Cybersecurity Consultant with 2 years of experience in Vulnerability Assessment and Penetration Testing (VAPT) across Web Applications, APIs, Android Applications, and Network Infrastructure. Skilled in Web Application Security, API Security, Infrastructure Security, Firewall Configuration Reviews, and Secure Source Code Reviews. Proficient in identifying vulnerabilities, performing risk assessments, and delivering detailed security reports with actionable remediation recommendations. Experienced in validating security fixes, supporting vulnerability remediation, and collaborating with clients to ensure secure application releases and compliance with industry security best practices, including OWASP Top 10.

PROFESSIONAL EXPERIENCE

- GRM Technologies, Cyber Security Consultant** 09/2024 – Present | Chennai, India
- Performed comprehensive Vulnerability Assessment and Penetration Testing (VAPT) across Web Applications, Android Applications, APIs, Network Infrastructure, and Wireless Networks.
 - Conducted secure source code reviews to identify logical flaws, insecure coding practices, and security vulnerabilities.
 - Reviewed and assessed firewall configurations to identify misconfigurations and improve network security posture.
 - Identified, validated, and documented vulnerabilities with appropriate risk ratings, CVSS scoring, and business impact analysis.
 - Prepared detailed security assessment reports with actionable remediation recommendations and mitigation strategies.
 - Collaborated with clients in both on-site and remote engagement models while managing multiple security assessment projects simultaneously.
 - Assisted clients in aligning security practices with industry standards, regulatory requirements, and security best practices.
 - Utilized industry-standard security tools including Burp Suite, Nmap, Nessus, Wireshark, Metasploit, and OWASP ZAP to perform security assessments and penetration testing.

EDUCATION

- B.E Cyber Security, Paavai Engineering College** 11/2020 – 05/2024 | Namakkal, India

PROJECTS

Virtualized Red Team Lab Environment

Designed and deployed a virtualized Red Team lab comprising a Windows client, Active Directory Domain Controller, Linux attacker machine, and Linux bastion host to simulate enterprise networks and practice penetration testing, Active Directory attacks, and post-exploitation techniques.

AWS Cloud Infrastructure Lab

Designed and deployed an AWS cloud lab by creating a custom VPC, configuring public and private subnets, Internet Gateway and NAT Gateway, and deploying multiple EC2 instances. Performed secure administration and network configurations using SSH to gain hands-on experience in AWS networking and cloud infrastructure management.

CI/CD Security Lab

Built and secured CI/CD pipelines using Git and GitHub Actions to gain hands-on experience in pipeline security, secret management, dependency scanning, and secure software delivery practices.
